

Division of Environmental Design	Research field	Architectural Planning and Design	Lab. ID
Laboratory web site			ED12
Research subjects			
<p>In the 21st century, situation surrounding Japanese architecture and urban environment has changed; for examples, population decreasing, children decreasing and senior increasing, building stock & management from scrap & build, respect to local characteristics, and so on. How can we build or manage our architectural and urban environment under the such situation? Our aim is to re-construct architectural and urban planning theories in the new situation where we can not apply old theories constructed under the situation of population increasing and urban expanding. We investigate design methods based on researches on living phenomena from the point of architectural and urban planning.</p>			
Master/Doctor course: Education policy, curriculum, typical activity in the laboratory			
<p>Master and Doctorial course students basically do research works at lab.. Research topic is set to each student on account of his/her need and specialty, and they finish study as a master course thesis or a doctor thesis.</p>			
Daily life in the laboratory, etc.			
<p>Students voices: We make reports on progress of our study on week seminars once in a week. We can develop our ability of how to read existing papers and how to make research presentation. We can spend times as we like in the lab. Our space is consisted of a students' room with each table and computer, in which Adobe's applications are installed, and a large work-room where we can make architectural models. There are a lot of architectural magazines and books there.</p>			
Message or comments by the laboratory faculty staffs			
<p>We conduct researchs such as on-site hearing of living areas of the elderly by all members. Therefore, our conducting guide is as follows; 1.Say greetings to everybody, 2.Respond to e-mails as soon as possible, 3.Make actions as soon as possible,4.Co-operate with members, 5.See by your feet, and think by your hands!</p>			
Recent Master theses in these 3 years (+ more if appropriate)			
year.month	Thesis title (including English translation of Japanese thesis title)		
2017.3	Discussion on Appropriateness of Establishing an Official Senior Case Service Areas Based on Comparison of Actural Conditions of the Elderly's Living Areas in the Local Three Cities		
2017.3	A study on urban structure of a historical city 'Kanazawa 'from the point of streets and moats		
2016.3	A CASE STUDY ON DAILY LIVING AREA OF SENIOR PEOPLE IN ALL CARE SERVICE AREAS IN A LOCAL CITY		
2016.3	DISCUSSION OF STRUCTURE AND CONTENT OF EARLY ADOPTING MUNICIPALITIES' PUBLIC FACILITY REORGANIZATION PLANS		
2014.3	A Case Study of Senior Care Sservices Area Settings Based on Junior high Schoo Districts -A Comparative Study of Official Service Area Settings and the Elderlys' Actual Living Spheres in a Regional Core City-		
2014.3	A case study on a model of local living support environment for the elderly to continue living at their own homes through their ageing changes		
2014.3	A case study on sustainability of urban environments through chronological and spacial changes of Sou-gamae moats in Kanazawa old town area		
2013.3	A Case Study of Actual Living Spheres of the elderly coming to day care centers in a Regional Core City-
